

With 2 years of experience as a React.js Developer, I specialize in building intuitive, responsive web applications that provide smooth user experiences. My expertise spans JavaScript, React.js, Next.js, Node.js, HTML, and CSS. I'm eager to tackle new challenges and continuously grow my skills.

SKILLS

Languages HTML, CSS, JavaScript, React js, Redux, Node js, Express js, MongoDB, Postman, Git,
Tools Elastic Search, Docker

TECHNICAL EXPERIENCE

Software Engineer
Grazitti Interactive

November 2022 — Present
Panchkula, Haryana

Developed Custom Solutions:

Designed and implemented custom functionalities using React and Node.js to address diverse client requirements, ensuring high-quality deliverables.

Search Optimization:

Worked extensively with Elasticsearch to optimize search performance, index large datasets, and fine-tune relevance based on user behavior and feedback.

Client Collaboration:

Partnered with clients to gather requirements, provide technical consultation, and deliver scalable solutions tailored to their business needs.

Frontend Development:

Created dynamic, responsive user interfaces using React, ensuring seamless user experiences across devices.

API Integration:

Integrated third-party APIs and internal tools to enhance platform functionality and meet client expectations.

Debugging and Issue Resolution:

Identified and resolved performance bottlenecks, reducing response time and enhancing application reliability.

Documentation & Training:

Prepared technical documentation and conducted client training sessions to support the deployment and use of solutions.

EDUCATION

Bachelor of Technology (CSE), Gulzar Group of Engineering, College 2019 -2023
Percentage: 83

Senior Secondary Certificate, Teza Singh Sutar Memorial Sen Sec School 2017- 2019
Percentage: 70

Matriculation, LittleFlower Public School 2016- 2017
Percentage: 83

PROJECTS

Blog Application

React js | TypeScript | Nodejs | Expressjs | MongoDB

I have made a full-stack blog application by building both the frontend and backend. Utilized React.js for a dynamic and responsive user interface, and Node.js with Express.js for server-side logic and RESTful API integration. Implemented MongoDB for data storage, ensuring efficient content management and retrieval.

My Portfolio

React js | TypeScript | Nodejs | Express js | MongoDB

I have made a personal portfolio website using React.js for the front end and Node.js for the back end.
